Protein and Carbohydrates

Rebuild Strength provides:

- 24 g of dairy protein
- Carbohydrate blend of maltodextrin, fructose and sucrose

Rapid-and sustained-release carbohydrates facilitate protein utilization to rebuild muscle

Why you need it:

Protein and carbohydrate are needed for muscle growth

3,000 mg of L-glutamine – Great for Athletes

Rebuild Strength provides:

- 3000 mg L-glutamine is an important amino acid
- Helps rebuild muscle after workouts

Why you need it:

- Lose up to 50% of L-glutamine during exercise
- Supports immune function*
- Without adequate recovery, fitness and health are compromised

*This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

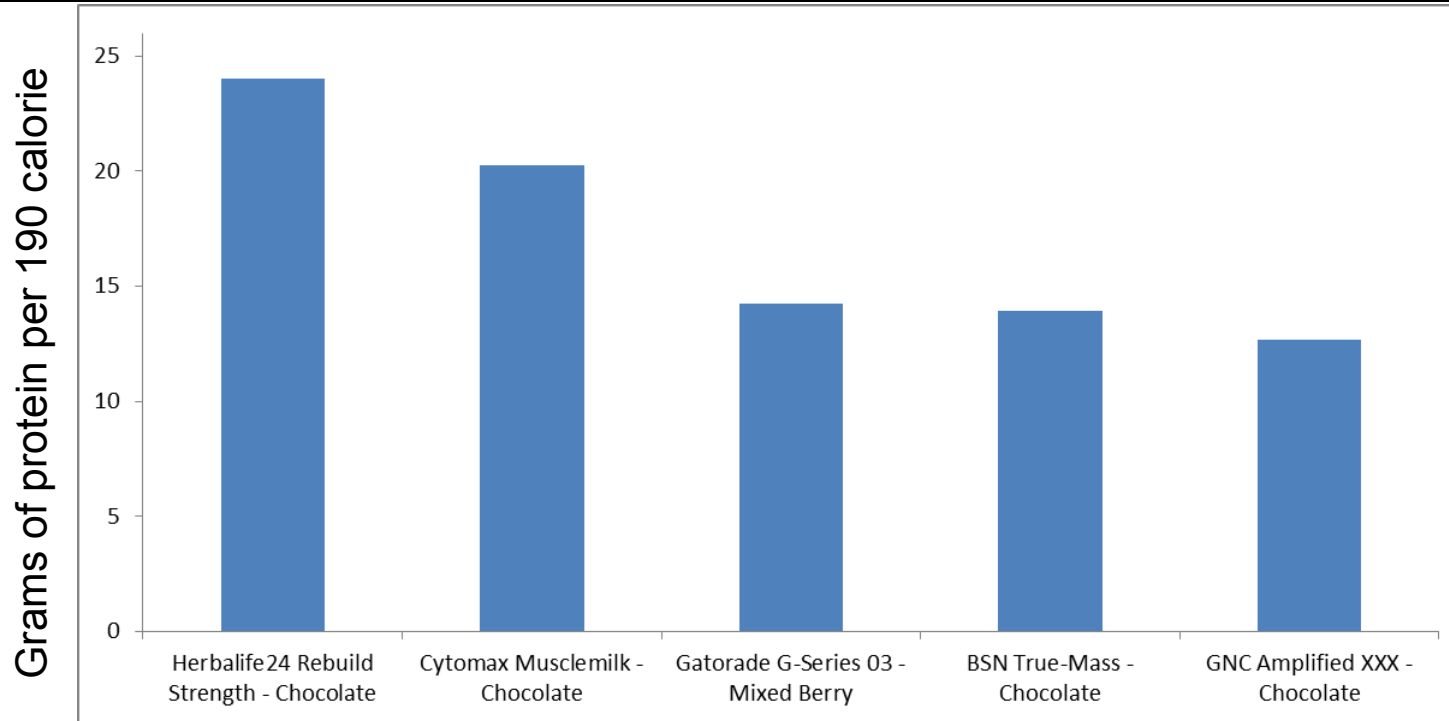

Did You Know?

Branched-chain amino acids (BCAAs) are named for their unique, branch-like structure

They are essential, and must be consumed in the diet. BCAAs are key initiators of lean-muscle synthesis.

Protein Comparison*

Protein content is shown on a per-190-calorie basis which reflects a single serving of Herbalife24 Rebuild Strength, and is done to normalize for differences among serving sizes and ingredient composition of competitive products. In some cases, more-than or less-than single servings are used for comparative purposes.

*based on 190 calorie serving size
